FRAME DESIGN

Using lightweight, race-proven Advanced Composite material, Giant engineers created a high-performance frame that was designed as a single high-performance system. From the all-new oversize OverDrive 2 headtube and fork to RideSense, an ANT+ compatible sensor built into the frame, and the all-new ride-tuned Giant WheelSystem, it's all designed with a common goal: optimized system performance. The frame also features the MegaDrive oversize downtube and the stiff, efficient PowerCore bottom bracket.
