FRAME DESIGN

Giant's first-ever composite 29er was developed to meet the demands of our professional racers. They asked for the stability and control of a 29er, but with razor-sharp handling. Made with Giant Composite Technology, the frame's massive MegaDrive downtube and OverDrive headtube give it quick, precise steering. Asymmetrical chainstays and a PowerCore bottom bracket boost traction and acceleration. Find new confidence, and speed, with Xtc Composite 29er.
